To Our Customers.

New York City, June 15th, 1896.

WE take pleasure in sending you this list of New Goods and Correction of Prices as Supplement No. 3 to our January, 1894 Catalogue of School Goods.

We do not publish a Fancy Goods Catalogue, but have spent a great amount of time and money in getting up a complete line. Our representatives will start out this month with full sample lines and call upon the trade as usual.

Our line in New York is the finest of any exhibited in this country and will well repay a visit of inspection.

DISCOUNTS.

To ascertain the discount on any article, you will find under the heading of such article a number in brackets; multiply this number by 10.

Thus: No. ½ would be 5 per cent.; No. 1, 10 per cent.; No. 1½, 15 per cent.; No. 2, 20 per cent.; No. 2½, 25 per cent.; No. 3, 30 per cent.; No. 3⅓, 33⅓ per cent.; No. 4, 40 per cent.; No. 5, 50 per cent, etc.

We thankfully acknowledge the liberal patronage extended to us in the past, and trust you may find it to your advantage to favor us with still more of your trade in the future.

We remain respectfully,

Tower Manufacturing & Novelty Co.,

306 and 308 Broadway,

NEW YORK CITY.

Slated Paper, 12 Yard Lengths.

Paper,	3	feet	wide,	slated	on	one	side, per yard	$1	00
"	4	"	"	"	"	"	"	1	25

This Slated Paper or Cloth will prove very acceptable. Teachers and popular lecturers will find it invaluable.

The surface is as perfect as one of the Eureka Blackboards, and it is perfectly elastic. School officers and teachers who are unwilling to incur the trouble and expense of applying the liquid slating may secure a good and cheap blackboard by tacking slated cloth or paper to the wall and nailing mouldings or strips of wood around the edge for protection and ornament.

PRICE'S CORUNDUM SELF-SHARPENING.

Patented July 19, 1892, and Feb. 21, 1893.

The function of this sharpener is divided into two distinct parts: 1st the knife to cut away the wood; and 2d the wheel or cylinder lined inside with corundum, to point the lead. The lasting qualities of this sharpener are thereby assured—and the existing difficulties with all other sharpeners has thus been overcome by the inventor. It will wear out 20 dozen lead pencils; will make any point desired, from a chisel shape to a point that will make a hair line.

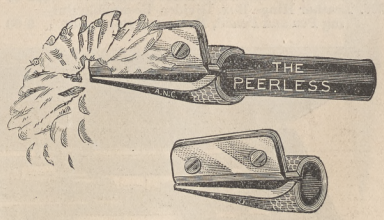
PERFECT.

Pointer and Clamp patented April 29, 1890.

Not only a necessity, but a genuine luxury, in office, home and school. It is clean, convenient and a great comfort; makes a perfect point, and never breaks the lead. Thousands testify to its efficiency and economy. Every machine sold causes a demand for others.

Perfect..... per doz $15 00



KOSMOS.

This is the most perfect pencil sharpener of its kind which has yet been manufactured. The pencil is sharpened to the finest point without injury or breakage of the lead.

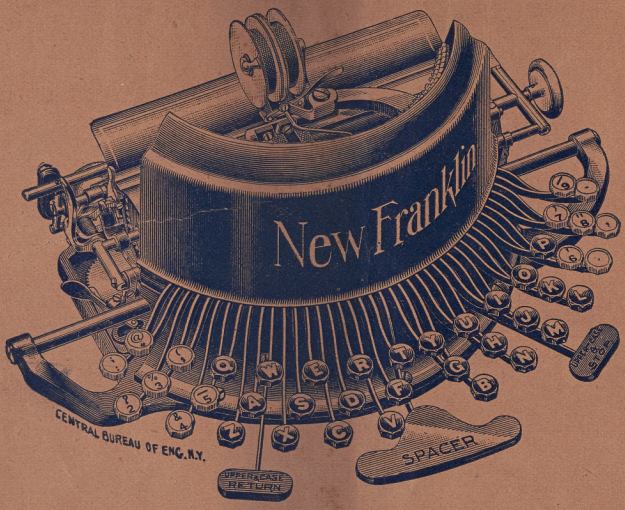
THE

FRANKLIN TYPE-WRITER.

STANDARD MACHINE AT A POPULAR PRICE.



Rapid, Simple, Perfect. **Writing Always in Sight.**

Perfect and Permanent in Alignment.

KEYBOARD:

The Keyboard of the Franklin is a great feature of the machine. Being circular in form, it provides for the natural position of the hands, not compelling operators to force their arms and hands together as required in the use of the square and limited compass of other machines, yet in arrangement, an operator can change from any machine to the Franklin at sight, without practice.

RIBBON:

The Ribbon arrangement is of the simplest construction, feeding horizontally across the type. It is fed automatically, using both edges of the ribbon, making a great saving in the wear, and may be easily removed for mimeograph work.

The Franklin has No Superior and costs but $75.00.

Liberal Discount to Dealers.
